Subject: LC-QQQ down  
Lauren,

The LC-QQQ is down. There is a bad board. The board has been ordered and should arrive Tuesday. We hope to be back running on Wednesday.

This impacts Hwy 36 work requiring LC analysis and majority of enforcement work behind that.

Will keep you posted.

Kathleen

[attachment "Hwy 36 Protocol11 9\_2011.docx" deleted by Scott Downey/R10/USEPA/US]  
Folks,

Attached is the overall Hwy 36 protocol for the round of sampling that has already occurred. It includes comparison values that we propose to use in evaluating the data when it becomes available. Elizabeth Allen and I worked on developing these together, and we have tried to keep technical people in the loop as we worked on them, but this may be the first time some of you have seen these comparison values all listed out in one place.

Our goal is to release this to the community prior to the Friday, November 18 meeting. In fact, our goal is to release it on Tuesday next week. So, if you could please have your comments to me by COB Monday, that would be wonderful. I realize this is a short turn-around time, but it has been our goal all along to make sure the community had our comparison values in hand before lab results came back.

I know I didn't get everybody on this email, but I tried to at least get agency heads and the technical folks I've interacted with. Please feel free to forward this to people within your agency that you would like to review it.

Hi All,

I just wanted to give a head's up that we have been asked by several community members to allow them to provide and/or display information of their own that they think is important to share with other residents.

We will be making the accommodation, but it will be in a separate space from where agencies will be meeting with community members - this to make it clear that it is separate from the Open House and also allow for people to choose whether they want to read with their fellow residents are offering up or not.

Jae

Date: 11/14/2011 11:06 AM  
Subject: Gina: would you pls call Kathleen Wickman on Tue, 11/15/11 in the morning at (503) 872-6633?

---

Hi Gina -- Kathleen Wickman of Oregon Dept of Agriculture Laboratory and her QA officer would like to discuss the QA data packages for the Triangle Lake/Highway 36 QAPP environmental samples with you. Due to the urgency of the project, would you please give them a call tomorrow?

If you have any questions before tomorrow's call, please send Kathleen an email (since she is not at the lab in Portland today). Kathleen's email address is [kwickman@oda.state.or.us](mailto:kwickman@oda.state.or.us)

Hi Sheila -- I received a call from both Dale Mitchell and Kathleen Wickman today, notifying me that an equipment at the ODA lab is not working and that they are trying their best to repair it. ODA was wondering if the lab could send some of the packages to EPA, and Kathleen wanted to talk to Gina to confirm that it would be ok to do that.

If you have any input to this, please feel free to send Kathleen an email.

Thank you both!  
Linda
